A wildflower mix with proven annuals and perennials resistant to deer browsing

Deer Resistant Wildflower Seed Mix annual and perennial wildflowers that are known to be resistant to deer browsing. While this mix helps deter deer browsing, it's not a guarantee against it, especially if natural food sources are scarce or deer populations are high. It offers long-lasting color, and supports pollinators even in areas with heavy deer activity.

Enhanced germination and establishment rates by up to 50% with Pinnacle seed coating.

Recommended Seed Rates:
1 lb. Cotton Bag: 2,000–6,000 sq.ft.
3 oz. Pouch: 200–500 sq. ft.

This mix is perfect for garden beds, borders, planter boxes, and other maintained spaces, and it can also be broadcast over larger areas for a more natural, meadow-like appearance. It's adapted to most areas of the United States. Our wildflower seed mixes feature Pinnacle seed coating from Summit Seed Coating, known for enhancing germination and establishment rates by up to 50%. Tests show that coated seeds consistently outperform uncoated ones, resulting in quicker growth, better coverage, and more efficient seed use—saving you money in the long run.

FEATURES

- ✓ Covers up to 6,000 sq ft
- ✓ Annual & perennial wildflowers
- ✓ 325,000 seeds per pound
- ✓ Coated with pinnacle clay for better germination

Available in 3 oz. pouches or 1 lb cotton bags
